

Public Meeting South Valley Drinking Water Project (SVDWP) East Side Source of Supply Transmission Pipeline

Teresa L. Córdova, Vice-Chair
Bernalillo County Commission

Invites you to attend a public meeting on the SVDWP – East Side Source of Supply Transmission Pipeline to provide an overview and details of the project. The public meeting is scheduled for:

Monday September 18th, 2006 6:00 p.m. at Polk Middle School

In May 2004 Bernalillo County and the Water Utility Authority completed the South Valley Water System Expansion Study. The study addressed the need to provide the South Valley with drinking water and fire protection. The study identified the total cost for the entire South Valley Drinking Water Project (SVDWP) to be approximately \$66.2 million. The first phase of the SVDWP is called the East Side Source of Supply Transmission Pipeline and it is currently under construction.

Construction on the Transmission Pipeline started May 22, 2006 and is anticipated to last through July, 2007 at a cost of \$14.1 million. Work started on the east side of the Rio Grande along Broadway Boulevard. As this work is nearing completion it has become necessary to move to the west side of the Rio Grande. The work on the west side started at Pajarito Road and the Isleta Drain on August 28, 2006. We are requesting your attendance, so that we can provide information on how the work on Pajarito Road will affect you and address your concerns.
